

# Personal Portfolio Website - Project Report

## Repository

<https://github.com/UdayShankarY/vcard-personal-portfolio>

## Overview

This project showcases a sleek and interactive portfolio designed for developers and freelancers. It features a responsive UI, category filters, dark mode, interactive modals, and contact features.

## Key Features

- Hero & About Me: Introduces name, role, skills, and background
- Skills: Visual bars for HTML, CSS, JavaScript, DSA, and backend stacks
- Portfolio Projects: Clickable items with modals
- Contact Form: Submission-ready

## Tech Stack

- Frontend: HTML5, CSS3, JavaScript
- Design: Dark theme using CSS variables
- Hosting: Vercel via GitHub

## Project Extras

- Smooth hover effects & animated transitions
- CSS variables for color theming
- Easy to extend with new sections

## What's Next

- JSON-based project feeds
- Netlify/EmailJS for contact
- Modal galleries and tech badges

## Summary

A polished, mobile-friendly portfolio that cleanly presents your work and skills.
